

# COMMON SENSE & FAIR SOLUTIONS

## UK Out of the European Union

- It's time to save the UK net contribution of £11.3 billion a year (ONS) and invest it in the UK. We would offer a clear commitment to leave the EU. 70% of laws come via the EU - end the interference in our law-making.

## Protect the Unity of Britain and NI

- Our United Kingdom - our unity and our position in the world should not be for sale or bargaining away. We are stronger together as a union.

## British Jobs - No to Globalism

- Rebuilding British industry and agriculture is vital to our economy and we must protect them from harmful EU Competition Law. The public sector must award contracts to British companies.
- We believe in protecting the jobs and standard of living of our own workers. There are over 2 million unemployed, and over 750,000 jobs each year are advertised in EU member countries.

## Values - Democracy & Free Speech

- Laws suppressing the right of free speech on contentious matters, without the defence of telling the truth must be repealed. We oppose militant faith groups undermining our values and traditions. There must also be obligations for the media to give equal treatment for all parties in elections.

## UK Borders - Stop all Immigration

- Conservative, Labour, Liberal Democrats and the Greens support mass immigration. UKIP support mass immigration from non - EU countries, which make up 60% of those who enter the UK each year.

- Net immigration last year was 298,000 (ONS). We will stop mass immigration - No 'ifs', No 'buts'. All illegal immigrants, their dependents, and those who commit crimes must be deported.

## Law & Order - Throughout the UK

- There should be no culturally-defined no-go areas in which drug dealing and grooming of girls is rife. Also prisoners should not have the right to vote and we would remove the UK from the Jurisdiction of the European Court of Human Rights.

## Stop Involvement in Foreign Wars

- There would be no more wars in places such as Iraq or Afghanistan for British troops, nor the Middle East. They would be re-deployed to protect our borders from illegal immigration.

## Key Services - NHS & Education

- There are 80,000 applications each year for just 8,000 UK university medical places, a ratio of 10-1. We should invest in our own population not offer scarce university places to foreign students.
- The state should pay tuition fees of able students who cannot afford to pay for their university education. More grammar schools and technical colleges are needed.
